

Our Contagious Connections

Viral Growth Through Disciple Making

Positive Infection and Contagion

It is a rare moment when the world is focused around a common challenge, or should we say, common enemy. Yet within the Christian community worldwide we always have a common focus. We are united in honoring our Lord Jesus Christ and fulfilling His mission--MAKE DISCIPLES of all nations (people groups). The global pandemic is a virus spread by human contact. Thus, to break the transmission of the virus, much of the world is practicing social or physical distancing. The image above was used for the purpose to show how to slow down the virus. But this same image can be seen in just opposite way through the lens of the Great Commission. It also shows what happens if a disciple of Jesus fails to fulfill their role to disciple others. See how many generations will not hear the gospel and be discipled if we do not take the baton of disciple making.

On the positive side, we are seeing the wisdom of the *micro group* as a means of transmission of the virus of making reproducing disciples. In this issue of our GDI Newsletter, we have invited our global partners to share some of their viral growth as well as the challenge that the pandemic is creating in their community.

Updates from Around the World

Catch the multiplying vision of the virtual virus to hand off your faith where you are!
